

Bulldog 240 AG Kit

Ammo Bag Description

- (2) 500 Round Ammo Pouches 1000 Round Capacity
- Cyclic Rates of Sustained Fire are now possible
- Ammunition is fed through an Aluminum Tension Apparatus, Eliminating the need for ammo to be hand fed
- During IMT, once the links are broken the rounds are held in place by the Tension of the Ammo Feed Bracket
- The Ammo Pouches are reinforced with Kydex to retain the Shape and Rigidity

Spare Barrel Matt / Quiver

- Same Material and Construction as current issue Spare Barrel Bag
Weight: 1 Lb.
- Barrel Matt holds the Tripod during IMT
- Spare Barrel Quiver will Securely hold a Hot Spare Barrel / same construction as Spare Barrel Bag

Custom 2 Day Ruck

- 2500 Cubic Inches: 1.5 Lb
- Mounts over Ammo Bags

Bulldog Rail Frame

- Aircraft Grade Aluminum
- All Seams are Welded
- Hardware is Stainless Steel with Nylon Lock Nuts
- Capacity 250 Lb.
- 220 Lbs. was carried 22 miles at Fort Bragg by an incredible soldier
- Shoulder Straps and Waist Belt are $\frac{3}{4}$ inch thick 4 Lb Density Foam

With the 240 Ag Kit it is possible while engaged the AG is not necessary, as in this picture!!! Truly a capability that is impossible with current equipment. *An overall weight savings of 12 Lbs.* is quantifiable.

3 Lb. weight savings from current spare barrel bag / 7 Lb. savings from current issue 2-day Ruck / 2 Lb. weight savings with our 4 Oz Hydration Pouch.
