

Bulldog 60-81mm Mortar Kit

The Current Method of Deployment through any type of Jungle, Woods, or Mountain Terrain is difficult with Todays Methods.

Now with the Advent of the Bulldog Rail Frame and Mounting Brackets we can mount even the most Awkward Weapon System Vertically.

With the Bulldog Frame we can Mount Brackets that will Securely hold the 60mm Mortar Tube, Bipod and Small Base Plate.

All Items are Welded and Secured with Stainless Steel Locking Hardware.

With the Bulldog Mortar Kit, can easily transition from their Machine Gun to their Mortars to Fire in Hand Held Method.

Due to the ability to place the Mortar Tube at an angle this prevents the Weapon System from hitting their heads while in the Prone Position.

81mm Capabilities
